

Advance announcement for the change in Subscription Prices of Indiastat.com for the year 2019.

This ongoing year is proving to be a crucial period of our transition phase wherein continuous efforts are being made to provide impeccable services to our esteemed subscribers.

In this year, besides regular updates, we have made substantial additions in our product deliverance and offerings. To the subscribers of Indiastat.om, we are being offering free access to 8 eBooks along with a special discount of flat 25% for purchasing any of the other available eBooks at www.datanetindia-ebooks.com

It should readily be approved that during all these years, we tried to maintain a minimum possible increase in our subscription prices. However, in last few years we have seen steep increase in sites & server maintenance charges, infrastructure cost, data procurement charges etc., due to which we are forced to increase subscription prices marginally.

We endeavor to keep going with the agenda of excellent quality and for that an increase in price is an apparent necessity. Though, we also ensure that our subscription prices would be increased within a permissible limit.

Our future subscription prices will be leaded by the following:

- 1) Subscription prices will be revised from 1st January of each year.

2) Subscription prices for the ongoing year will be applicable till 31st Dec only.

3) Subscription prices will be increased by a minimum percentage of 5% for Indian Subscriptions. However, this time subscription price for international subscriptions will be increased by 3%.

4) Price increase do not include 18% GST (Goods & Services Tax).

For the year 2018, subscription price for subscribing Indiastat.com w.e.f 1st January 2019 will be:

For National Subscribers (from India & SAARC nations)
